# COMMANDER

The WFW Commander is a fast, agile, compact camera platform built for any terrain, and is ideal for multiple camera application; steady cam, hand held, hard mounted, and remote heads. There is a custom built camera post with an isolation dampener for stabilized or non-stabilized remote head applications. The post is easily adjusted for varying heights, or for rear/side shooting positions. Integrated speed rail makes operator seating/shooting positions quick and safe. All riders are provided with four-point race harnesses and safety helmets with voice activated communication.

## COMMANDER FEATURES

- 5' x 10.5' x 6' high • adjustable camera post with isolation dampener
- 1000cc V-Twin engine, top speed 110 km/h
- street or off road tires available
- automatic transmission, two or four wheel drive
- garage/underground capable, 72" clearance
- built in 1200W inverter w/opt 2K Honda Genny
- riders supplied w/four point harnesses and helmets
- fully adjustable gas nitros and airbag suspension
- onboard communication system included

# TECHNODOLLY

The TechnoDolly represents the next generation in articulating cranes. The TechnoDolly is a fully repeatable 15' SuperTechno with unparalleled flexibility and versatility. The system can repeat and output the encoded pan, tilt, track, elevation, focus, iris and zoom data to industry standard software in real time or to an ascii file. You can build moves through simple, organic keyframing, standard operating mode or even in an industry first, free-form for a hand held effect.

## TECHNODOLLY FEATURES

- Quick set-up time
- Extremely versatile, actor driven motion repeatable
- Multi-axis repeatable (dolly, crane, articulation, full lens function)
- Cost efficient (use as standard 15' ST when not in use for moco)
- Small arm with a large shooting area; 15' high, 25' wide, 80' long
- Super quiet operation, ideal for sound
- Very precise, better than +/- 0.2mm

# ARRIMAX M40 & M18

WFW is excited to be the first company in Canada to offer the ARRIMAX M40 and ARRIMAX M18 for your equipment needs! The lights provide a lensless daylight par system, offering controlled and even, dispersed lighting without the need to handle spread lenses. This is the perfect light for those looking for efficiency, simplicity and quality.

## ARRIMAX M18 & M40 FEATURES

- Lensless system removes need for additional lenses, reducing set up time and liability
- Around 30% brighter and 3kg lighter than its predecessors
- Implementation of CLL module (compensation for cable loss) allows light to maintain its brightness even when using long cables
- Tubular steel yoke adds to durability
- Cross Cooling allows for safe operation at extreme tilt angles
- Weather resistant IP23 rating
